

Programme offer form exchange students 2017-2018

This application form lists all the courses and programmes that exchange students can enroll in at Maastricht University Faculty of Health, Medicine and Life Sciences.

For information about the course content, please enter the name of the course as a search query on our website: <https://www.maastrichtuniversity.nl/education/course-finder>

All our courses are taught in English. Therefore, please be aware that proficiency in English is required (at least B2 level).

Most courses that we offer are part of a programme; only in some occasions we offer separate courses. Courses in a programme should be followed in chronological order, meaning that you start with the first course and then work your way down. Skipping courses in between is not allowed, nor can you combine courses from several programmes. These rules do not apply to the separate courses; you can pick whatever separate courses you are interested in, as long as you make sure there is no overlap with regard to the period in which these separate courses are taught.

Download this form to your own computer, select the courses you would like to register for by ticking the boxes, save it in Word-format on your own computer and then upload it along with the other required documents for your application at Maastricht University Faculty of Health, Medicine and Life Sciences.

Deadline for application:

- Autumn semester: 04-07-2017
- Spring semester: 20-11-2017

BACHELOR

European Public Health Programme

Autumn Semester: 04-09-2017 / 02-02-2018

Limited to 15 students per semester

Introduction day: 28-08-2017 (mandatory)

ECTS

Placement (internship) for master students Biomedical Sciences, European Public Health and Health Sciences

- Deadline for application is 6 months prior to the start of the programme.
- Placements are on individual request. Departments decide whether a student is accepted or not, however all requests for a placement have to go through the International Relations Office.
- There are no fixed places available. It depends on the research demand as well on the availability of capacity in a department.
- An interview by Skype in English can be part of the selection procedure to define the level of English proficiency.

I would like to participate in the following placement. Always starting on a Monday:

Period: fromto.....

☐ 1st choice

.....

☐ 2nd choice

.....

☐ 3rd choice

.....

Medicine clinical electives and research electives

Department-based orientation clinical electives

- Deadline for application is 6 months prior to the start of the programme.
- Orientation electives are on individual request. Departments decide whether a student is accepted or not, however all requests for an elective have to go through the Institute for Education. There are no fixed places available. Please mention a 2nd and 3rd choice, in case your 1st choice cannot be met because of capacity problems.
- Minimum period is 4 weeks, maximum duration is 6 weeks.
- An interview by Skype in English can be part of the selection procedure to define the level of English proficiency.

I would like to participate in the following orientation clinical elective(s). Always starting on a Monday:

Period: fromto.....

☐ 1st choice

.....

☐ 2nd choice

.....

☐ 3rd choice

.....

Period: fromto.....

☐ 1st choice

.....

☐ 2nd choice

.....

☐ 3rd choice

.....

Period: fromto.....

☐ 1st choice

.....

☐ 2nd choice

.....

☐ 3rd choice

.....

Research electives

For research electives the aim is to have the student himself applying the empirical cycle of research. Therefore, the most successful approach is to involve the students in ongoing research at our institution, and to attach the student to one of our staff members who is willing to coach a student performing a tiny element of his research project under close supervision.

General characteristics

The primary aim of a research elective is to become acquainted with and to take part in research relevant to medicine. It is therefore important that during the research elective the students are involved in the different stages of research, including:

- Formulating a research question;
- Designing appropriate research methods;
- Processing and analysing research data; and
- Critically evaluating these data in the light of the pertinent international literature.

The requests for research electives take place on an individual basis.

- Deadline for application is 6 months prior to the start of the programme.
- Departments decide whether a student is accepted or not, however all requests for an elective have to go through the Institute for Medical Education. There are no fixed places available.
- Minimum period is 8 weeks.
- An interview by Skype in English can be part of the selection procedure to define the level of English proficiency.

I would like to participate in the following research elective(s) (mention the subject):

Period: fromto.....

☐ 1st choice

.....

☐ 2nd choice

.....

☐ 3rd choice

.....
